CAREER OBJECTIVE

Motivated B.Tech CSE student and aspiring Full Stack Developer skilled in Java, DSA, HTML, CSS, JavaScript, Node.js, Express.js, and databases. Seeking an entry-level Software Developer role to apply my coding skills, build scalable web applications, and grow through real-world projects.

EDUCATION

Bansal College of Engineering B.Tech in CSE	CGPA: 7.90 4 th sem
XII (CBSE Board)	71.2%
X (MP Board)	87.8%

SKILLS

Languages:	Java, C, JavaScript
Web Technologies:	HTML, CSS, JAVASCRIPT, EXPRESS JS AND NODE JS (INTERMIDATE)
Database:	MySQL
Concepts:	Data Structures & Algorithms, OOP, REST APIs
Tools:	GitHub, IntelliJ IDEA , VS Code, Vercel , Antigravity ,Slitch, Google Studio, Claude

PROJECTS

LocalConnect - Social Commerce Platform for Local Sellers

- Developed a full-stack social commerce platform to help local sellers list products and connect with nearby buyers.
- Built buyer and seller flows with product listings, authentication, marketplace pages, product details, and chat-focused user experience.
- Designed a premium responsive UI using React.js with modern components, filters, product cards, seller profiles, and mobile-friendly layouts.
- Implemented backend APIs and database integration for user, product, and marketplace management.
- Used AI development tools for UI planning, code generation support, debugging, and feature improvement while customizing and understanding the project flow.

GitHub: <https://github.com/Nikhileshgayakwad/localconnect>TRAINING & CERTIFICATIONS

Leftover Chef AI – AI-Based Recipe Suggestion Platform

- Built an AI-powered recipe suggestion web application that helps users generate meal ideas from leftover ingredients.
- Designed a clean and responsive frontend for ingredient input, recipe generation, and user-friendly result display.
- Focused on solving food waste problems by suggesting useful recipes based on available ingredients.
- Deployed the project on Vercel for easy public access.

ACHIEVEMENTS

- Secured 1st position in Badminton at college-level sports competition.
- Built and deployed multiple web projects with AI-assisted development support, including LocalConnect, Leftover Chef AI.
- Solved Data Structures & Algorithms problems using Java and completed major DSA topics including arrays, strings, linked list, stack, queue, recursion, trees, and searching/sorting.
- Maintained coding practice profiles on LeetCode and GeeksforGeeks.
- Created project-based solutions related to local commerce, AI-based recipe suggestions, student learning resources, and record management.
